

Spray wall type NFT

With dry filter type AV

Catalogue: NF03
Tab: 44
Page: 02.00

Description

The spray wall type NFT can be used for spray painting. Spray wall with dry filter is especially suited for small intensive spray painting.

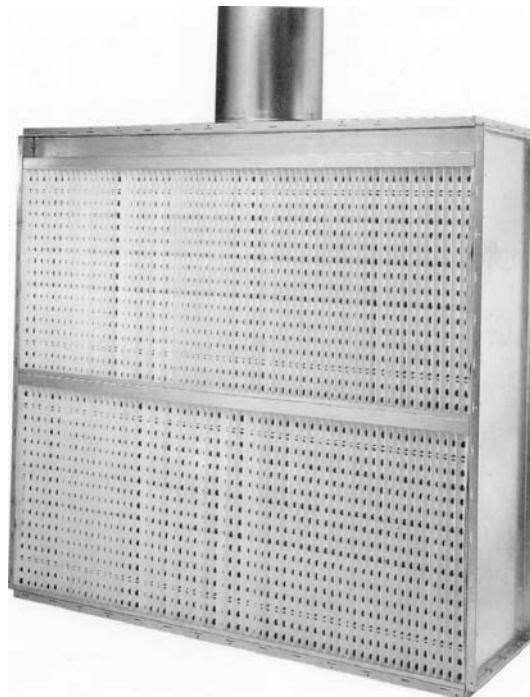

The spray wall is made of galvanised steel sheet and delivered assembled.

The dry filter is an "Andrea" throw-away filter, which can be used for all painting types, glue, polyester etc.

The filtering degree is approx. 90 % and the filter can take up 20 kg solids per m².

The spray wall can also be delivered with labyrinth steel lamellas. If more filtering is wanted, a filter basket with replaceable filter mat can be mounted in the spray wall. Hinged side plates with a width of 600 mm can be mounted on the spray wall.

The spray wall can also be used as a fume panel. Beyond the dry spray wall programme DISA also can offer a complete wet spray cabin / sludge separator programme.

Version 1003GB

Advantages

- Compact construction
- High separation
- Maintainability
- Side plates as modular system (accessory)

Accessories

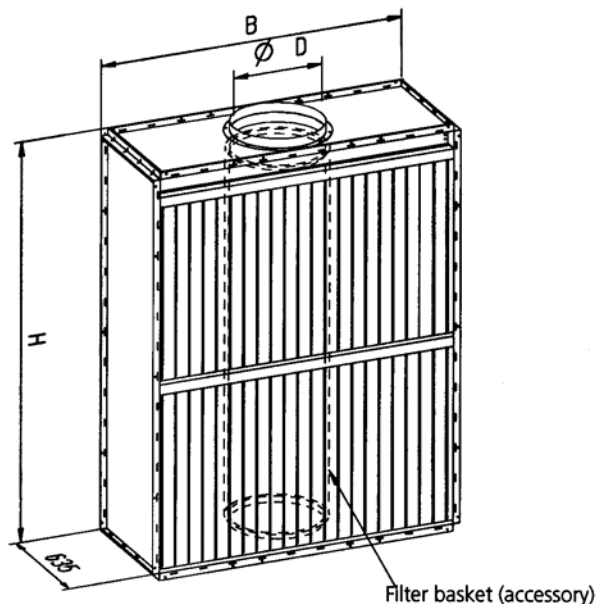

- Side plates
- Filter basket with replaceable filter mat
- Automatic blast gate
- QF system
- Fan
- Side module wall / ceiling
- Light fixture art. no. 49001.270
- Fresh-air inlet
- Electric control / automatic
